SKILLS

- **Languages:** Python, C++, C, JavaScript
- **Data Science & ML:** NumPy, Pandas, Scikit-learn, Plotly, Seaborn, Matplotlib, Power BI
- **Tools & Framework:** Django, MySQL, MS Excel, Git & VCS (Version Control System)
- **Soft Skills:** Collaboration, Logical Reasoning, Problem-Solving, Adaptability

PROJECTS

- **Resolv: An expense splitter app | [GitHub](#) :-** Jan 26 - Feb 26
 - Built full-stack expense-splitting app with Django REST Framework backend, vanilla JS frontend, and SQLite database; tested all APIs via Postman.
 - Engineered 4 split-type algorithms (Equal, Exact, Percent, Item-based) with automatic server-side split calculation and data integrity validation.
 - Implemented JWT authentication, soft-delete patterns, and settlement security (duplicate checks, self-settlement blocks) following web security best practices.
 - Designed responsive neo-brutalist UI with 2 phase dynamic debt simplification algorithm, real-time balance computation, and Chart.js data visualisations across 4 interconnected pages.

Tech: Django, Python, JavaScript, HTML, CSS
- **KrishiSense: Asian Food Security Monitor | [Live Link](#) :-** Oct 25 – Nov 25
 - Designed an interactive end-to-end Power BI dashboard analysing 20+ years of FAO & World Bank data to track food security trends against SDG 2 targets.
 - Engineered a robust Star Schema data model and authored 30+ advanced DAX measures (Time Intelligence, YoY Growth, Moving Averages) to quantify agricultural efficiency.
 - Visualized complex correlations between GDP, Political Stability, and Malnutrition using Scatter Plots and Drill-through features, revealing that instability impacts hunger 2x more than production deficits.

Tech: Power Query for ETL, Dynamic Slicers, Custom Tooltips, and Interactive Navigation

CERTIFICATES
